

RIO SAPUTRA

Data Engineer | Google BigQuery | SQL | ETL | Dashboard

Location: Pekanbaru, Riau, ID
Email: rio.shacou@gmail.com

Phone: +62 821 701 997 66
LinkedIn: linkedin.com/in/riosaputra

TECHNICAL SKILLS

CLOUD & DATABASE

Google BigQuery, Oracle, PostgreSQL, SQL Server, MySQL, Data Cloud

ETL & TOOLS

SSIS, Pentaho, Python, PHP

LANGUAGES

SQL, Python, JavaScript, HTML, CSS

FRAMEWORKS

CodeIgniter, Laravel, MVC

BI & REPORTING

Looker Studio, PowerBI, Dynamic Dashboards

EDUCATION

Associate Degree (D3) Informatics Management

Universitas Putra Indonesia YPTK Padang

2010 – 2013 | GPA: 3.19 / 4.00

PERSONAL DETAILS

Place, DOB: Pasaman, Jul 29, 1992

Marital Status: Married

Nationality: Indonesian

PROFESSIONAL SUMMARY

Data Engineer with **7+ years of experience** across April Group & Sambu Group. Specialized in architecting *data pipelines*, *data warehouses*, and business intelligence *dashboards* to drive large-scale operational decisions. Highly proficient in Google BigQuery, Oracle, SQL, SSIS, and Pentaho. Proven track record of optimizing query performance and building resilient ETL solutions for high-volume enterprise data.

PROFESSIONAL EXPERIENCE

Data Engineer

2018 – Present

Integrated Operation Plan (IOP) | April Group

- Engineered and managed end-to-end data pipelines for **5+ forestry operational departments**, handling **10M+ annual records** (planting, harvesting, species, and seedlot data).
- Architected enterprise data warehouses in **Google BigQuery & Oracle**, resulting in a **60% reduction in query execution times** for executive reporting.
- Developed **15+ real-time dynamic dashboards and reports** using SSIS, Pentaho, and BigQuery to support strategic management decision-making.
- Optimized complex SQL queries and resolved ETL pipeline bottlenecks, ensuring 24/7 data availability with **99% accuracy** for **200+ internal stakeholders**.
- Integrated multi-source operational data into Data Cloud for predictive modeling and plantation planning.

Quality Check Application Developer

2016 – 2018

RSUP Sambu Group

- Designed and deployed a web-based MVC Quality Check application to digitalize hybrid coconut inspection workflows, eliminating manual paper logging.
- Developed **10+ dynamic quality control reports** using SQL Server & PHP, reducing quality audit lead time from **2 days to 4 hours**.
- Provided system maintenance and application support for **50+ field QC inspectors**, improving inspection data accuracy by **30%**.
- Integrated field quality check data into a centralized database to enable real-time product quality trend analysis.
